WARNING: READ BEFORE USING YOUR PLAYSTATION®2 COMPUTER ENTERTAINMENT SYSTEM.

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games, including games played on the PlayStation 2 console, may induce an epileptic seizure in these individuals. Certain conditions may induce previously undetected epileptic symptoms even in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game – dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions – IMMEDIATELY discontinue use and consult your physician before resuming play.

WARNING TO OWNERS OF PROJECTION TELEVISIONS:

Do not connect your PlayStation 2 console to a projection TV without first consulting the user manual for your projection TV, unless it is of the LCD type. Otherwise, it may permanently damage your TV screen.

USE OF UNAUTHORIZED PRODUCT:

The use of software or peripherals not authorized by Sony Computer Entertainment America may damage your console and/or invalidate your warranty. Only official or licensed peripherals should be used in the controller ports or memory card slots.

HANDLING YOUR PLAYSTATION 2 FORMAT DISC:

- This disc is intended for use only with PlayStation 2 consoles with the NTSC U/C designation.
- Do not bend it, crush it or submerge it in liquids.
- Do not leave it in direct sunlight or near a radiator or other source of heat.
- Be sure to take an occasional rest break during extended play.
- Keep this compact disc clean. Always hold the disc by the edges and keep it in its protective case when not in use. Clean the disc with a lint-free, soft, dry cloth, wiping in straight lines from center to outer edge. Never use solvents or abrasive cleaners.

Introduction

Hard Rock Casino captures the excitement and spectacle of becoming a swingin' High Roller in the world's most exciting casino, The Hard Rock. You can try your luck at over 20 different casino games, as well as experiencing high stake areas, invitation only tournaments, and many unlockable upgrades for your highly customizable character. The action spans across multiple casino environments filled with different themes and characters. All of the casinos and games are presented in true 3D with multiple camera angles showing off the gaming floor as well as presenting the action in a television broadcast style.

Adventure Mode:

Adventure Mode begins by having you create a character which you will control throughout the game. Once this is done, you'll begin the game in the lobby of the Hard Rock Casino. Use the directional buttons to move to the different rooms. There are rooms for Poker Games, Table Games, Slots, and Sports Book betting. Inside each of the rooms are a number of games to play. Use the directional buttons to move to the different games in each room and select one with the ✕ button. As you play different games, you are presented with a series of goals and challenges that you must complete to advance through the Casino Adventure!

Quick Play:

Quick Play randomly generates a character for you to play as and allows you to select any of the unlocked casinos to play in. You can play any of the casino games for fun or for practice.

Tournaments:

Play any of the games in a tournament format against other players. Tournaments are set up in a heat format so that you

often have to finish in the top three to advance to the next round. For some tournaments, the heats are time based so the players with the most money at the end of the time limit will advance. Other tournament heats are based on a number of rounds or hands.

Tutorials:
Instructions on how to play all of the games in Hard Rock Casino can be viewed by selecting the Tutorials option from the Main Menu.

How to play

There is a lot of information to consider when playing Hard Rock Casino. For all table and poker games (except for Craps and Roulette), a list of the players at the table is displayed along the left side of the screen. As they make plays or reveal their cards, this list will update to reflect their actions. For all games, your bankroll is displayed in the lower center of the screen. Your cards are always displayed just above your bankroll. If there are dealer cards or community cards, they are always displayed in the upper right side of the screen. Player options for making bets and plays are always located on the Poker Chip graphic, located in the lower right side of the screen.

Making a Bet:
When it's your turn to bet, a poker chip graphic is displayed in the lower right of the screen. Bets are placed by pressing up, down, left or right using the directional buttons to adjust the bet amount and then pressing the ✕ button to confirm. For games where you place bets on the table, such as Roulette, use the Left Analog stick to highlight the location you want to place a bet. Once a bet location is highlighted, use the directional buttons to adjust the bet amount and press the ✕ button to confirm.

Making a Play:
Each game has specific selectable options (such as "Hit" and "Stand" in Black Jack) which change based on the state of the game. These selectable options are displayed on the Poker Chip graphic located in the lower right of the screen. Selections are made by pressing and holding the appropriate direction using the directional buttons and then pressing the ✕ button to confirm. If you move to a selectable option and decide not to select it, simply release the directional buttons to center the highlighter.

Saving and Loading:
You can save your game at any time by going to your hotel room. Your hotel room can be accessed from the Lobby Check In at all of the Casinos. You can load a saved game at any time by accessing the Load option from the Main Menu.

Options Menu (Main Menu and In-Game)

The Options Menu can be accessed from the Main Menu.
From in-game, you can access the Options Menu by pressing the Start button. This gives the following list:

Gameplay:
This option allows you to adjust Gameplay settings

Sound:
This option allows independent control of the volume of the music and sound effects. Use directional buttons on the sliding bars to change the volume.
